Questions To Understand Your Requirement

Prepared by:
Jimmy Thakkar & Team

QUESTIONS

BEFORE WE START A PROJECT

WHAT WE ASK:

Mention the specifics or leave it all to us!

We ask you to share as much details as possible so that you do not lose time and we do not lose time, money and effort. Example, if you wanted only a specific type of design or colour for your graphics or website then it would be best to tell our team in advance rather than mentioning about it once half the work is done. If you have no specifics then leave it to our professionals to deliver you the best.

A) GRAPHICS DESIGN

1. If it is a logo then what kind of logo do you want?
2. Only initials or the full name to appear on the logo?
3. Specify size and dimensions for graphics output.
4. Specify if you require graphics to be of a particular colour, look or style.

B) DIGITAL MARKETING

1. If you have a specific keyword in mind then please feel free to mention that in advance. We generally take projects where we can generate traffic from all directions rather than one particular keyword or search engine.
2. If you have a product or service in hand and are looking at end result only (inquiry or sales) then that works for us as well.

C) WEBSITE DESIGN

1. How many pages will the website be?
2. Do you want digital marketing? What are you targeting?
3. Do you need domain and hosting?
4. Do you need logo?
5. What kind of design you looking for? (Any site you like or want similar to)

Jimmy Thakkar & Team

FEATURES

PROVIDED BY JIMMY THAKKAR

WEBSITE DESIGN

We make SEO friendly and responsive (mobile friendly) websites.

All our website design projects include optional widgets, features or plugins which include: Live chat, WhatsApp integration, Social media integration, Contact form(s), Login details for site management + Tutorial on how to manage the website yourself, Stock images appropriate for your website, Blog integration, Google reviews integration, Google maps integration and much more.

HOSTING

The solid LiteSpeed Web Server hosting keeps your website fast and secure so you do not have to worry about any downtime. All websites guaranteed 99.9% uptime along with unique features such as free SSL certificate integration and Professional/Business email ids for you and your co-workers.

DIGITAL MARKETING

Only White hat SEO techniques will be used on your website and all reports will be given to you for the results achieved along with cost breakdown for all your campaigns online. We not only help you with generating organic traffic, but also CRO which helps you convert visitors into sales or inquiry.

GRAPHICS

All the graphics work done for you will be provided in the format and the size which is most appropriate for your project. Example, If you have ordered a Facebook page banner then it will be provided to you in the same dimensions required by Facebook for Facebook page; If you require a square image for WhatsApp or Instagram then it will be provided to you in that format and size.
